Reset User Password

Resetting an account password will log out all sessions. Before doing this, make sure that

- all sessions are connected to key backup,
- all sessions have backed up all their keys. See Check Status, and
- the correct key backup passphrase is available.
- 1. Click Your Account and Manage Servers or click this link https://ems.element.io/user/hosting.
- 2. Click Server Admin, select your host, then Users
- 3. Click the user you want to manage
