

Configuring Element Web

See how to download example files from the helm chart [here](#).

Configuration

For a quick setup using the default settings, see the minimal fragment example in `charts/matrix-stack/ci/fragments/element-web-minimal.yaml`.

Additional configuration

Additional Element Web configuration can be provided inline in the values as a json string with

```
elementWeb:
  additional:
    user-config.json: |
      {
        "some": "settings"
      }
```

Disabling Element Web

Matrix Authentication Service is enabled for deployment by default can be disabled with the following values

```
elementWeb:
  enabled: false
```
