Pip cache errors

Issue

- The installer is failing at the pip stage with such kind of error message:

```
Collecting pycparser
Using cached pycparser-2.21-py2.py3-none-any.whl (118 kB)
ERROR: THESE PACKAGES DO NOT MATCH THE HASHES FROM THE REQUIREMENTS FILE. If you have
updated the package versions, please update the hashes. Otherwise, examine the
package contents carefully; someone may have tampered with them.
 ansible-core==2.13.5 from

```

Environment

- Ubuntu 20.04
- Standalone installer 2022-10.02 updating to 2022-11.01-pre1

Resolution

- You need to clear the pip cache dir to force pip to re-download the collection.

```
cd ~/.cache/pip
rm -rf http
```

Root cause

- Undetermined at this time, probable cause is a storage issue.
